Part 1: Mindset and Motivation

My career goals:

- Start with your reasons for seeking a job
- Focus on growth opportunities

My dream job:

- Be as specific as possible so you know what you're looking for

Skills I have:

- **Technical Proficiency**: Mastery of core engineering principles and technologies.
- **Problem-Solving Abilities**: Aptitude for analyzing complex problems and devising effective solutions.

Skills I want to learn:

- *List any skills you need to hone.*
  - *Add any steps needed to acquire those skills.*
- *Move items here to the list above once you've mastered them!*

Part 2: Application Trackers

Job Opening	Application Status
Job Opening 1 • *Add the position you're applying for in the company* • *Embed links to the job description*	☐ Researched the role ☐ Updated my CV and portfolio ☐ Wrote a bespoke cover letter ☐ Sent application ☐ For interview!
Job Opening 2 • *Add the position you're applying for in the company* • *Embed links to the job description*	☐ Researched the role ☐ Updated my CV and portfolio ☐ Wrote a bespoke cover letter ☐ Sent application ☐ For interview!
